3D-LIPO

Halo Beauty are proud to be certified 3D-Lipo clinic. Offering an advanced treatment against targeted fat reduction, cellulite and skin tightening. Utilising the latest innovation in fat reducing technology, 3D-Lipo offers Ultrasound Cavitation along with Cryolipolysis (commonly known as 'fat freezing'), a procedure that targets localised fat regions, encouraging your bodies natural absorption of fat cells.

Ultrasound Cavitation

Ultrasound Cavitation is the natural process triggered through the 3D-Lipo equipment, by which ultrasound waves enforce pressure on fat cells. Unable to withstand the pressure (undetectable to the client), the fat cell membrane reverts to a liquid state to allow for the bodies natural absorption.

Medium area (60 minute)	£80
Course of 8	£560
Large area (75-90 minutes)	£125
Course of 8	£875

Cryolipolysis

Cryolipolysis selectively targets the water content of fat cells. The selected region is cooled to -6 degrees celsius and maintained for a tailored time period. The frozen cells begin a natural removal process over a period of 2-4 months.

1 Area	£250
2 Areas	£450
3 Areas	£650
4 Areas	£850

Cyrofuze

Following any 3D Lipo fat removal, we have developed a 5 minute Cyrofuze (PPC).

Benefits

Support the breakdown of fat in the body to smooth unsightly cellulite and enhance skin tone, increasing the skins elasticity.

RADIO FREQUENCY

For many clients, fat reduction is only part of their concern. There is also a desire to improve the appearance of cellulite and to tighten skin in specific areas of the body. 3D-Lipo has developed a 3 tiered approach to respond to these issues. The use of Ultrasound Cavitation along with Cryolipolysis will ensure cellulite reduction alongside fat loss, yet through the addition of a radio frequency treatment, skin will become tightened and display its natural looking elasticity.

60 minute treatment	£60
Course of 8	£420
Radio frequency, skin tightening facial	£50

Our registered aesthetic nurse practitioner is available for anti-wrinkle injections as well as dermal fillers.
